All it takes is

00:00:15

ALSOFT E Gentle on the hands, saves lives.
ALSOFT E is a hygienic and surgical handrub product developed by Japan’s leader in hand hygiene, Saraya Co. Ltd. Having 2 kinds of alcohol and PHMB as its active components, efficacy against a broad spectrum of microorganisms can be achieved in a brief contact time with sustaining effect.

**PRODUCT FEATURES**

Contains PHMB
Polyhexamethylene Biguanide Hydrochloride, A unique ingredient with excellent biocompatibility (high bactericidal activity and low cytotoxicity)

Fast-acting antimicrobial agent
- Surgical handrub within 1.0 minute
- Hygienic handrub within 15 seconds

Effective against a broad spectrum of microorganisms
Kills most common bacteria, yeasts, mycobacteria and viruses

Gel-free formula
Does not contain any gelling agents which can cause clogging and leave a sticky after-feel on the skin

Contains moisturizers
Moisturizers with excellent skin feel (clean and smooth)
